

November 18, 1952

Dear Aaron:

Have you given any thought about when you might be interested to pay us, and Genetics 107, another visit? As far as the class is concerned, anytime now till Christmas would be fine. I have then keyed up to a high pitch of interest in chemostasis.

Luria is giving an Enzyme Institute seminar on December 3. However, unless you have been looking for an occasion to see him, this may be rather an inopportune time for your own visit.

I'll be landing at Chicago en route home from a trip to Boston Saturday night. Unfortunately, there's only a 45-minute stopover but I'll try to get you on the phone (ca. 945-10:30 PM, 11/15/52 flight 5 TWA), if you're home. If you've had this chance to think about it, perhaps we can arrange a date.

How are Jane and David getting on? I don't suppose I have to be too concerned whether anyone will be home Saturday night.

Best...

Joshua
